Business Challenges:

Bentall Kennedy, a globally respected Property Management company, was looking for a cost-effective way to manage environmental and occupational health & safety issues across the portfolio of sites they manage.

Our Solution:

Refined Data OHS & Environment Modules

Bentall Kennedy uses the Refined Data Environmental and OHS modules to manage the wide array of human health and safety and liability risks associated with operating large properties. Bentall Kennedy have gathered all the relevant information, documentation and reports into Refined Data and can get anything they need in seconds. They also use our regulatory summaries for Property Managers to ensure compliance with the laws & regulations applicable to each site.

Specific Features:

Everything you need to manage environmental and OHS risk is at your fingertips. The software has a dashboard system that allows you see a summary of relevant data across the portfolio, with drill down capability if you need more detail. Site operators love the software because it is easy to use and they don't have to log into multiple systems to manage their sites. The mobile app makes management of tasks and information in the field a snap.

Business Benefits:

By providing OHS and environmental tasks, information and reports on a single system, Refined Data delivers the right information to the right person at the right time. This reduces operational risk and saves money by streamlining workflows.

Use cases:

The environmental and OHS modules apply to any real estate company that operates multiple sites where these issues need to be managed on a comprehensive but easy-to-use solution.
